The Conference

*CREATIVE INNOVATION
in the Construction industry*

29&30 April 2018

DUBAI ISMAILI CENTRE

Italian Industry & Commerce in UAE IICUAE

ITALIAN ARCHITECTURE & ENGINEERING CONGRESS

Welcome to DUBAI 2050

Welcome fellow Colleagues,
in a market as important as that of the Emirates construction we thought it demonstrate to fellow Italian Colleagues the scenario by providing information and criteria for those who want to try their hand at this reality.

Giuseppe Ronchi
First Officer IICUAE

Italian Industry & Commerce in UAE IICUAE

I CONSIGLIO
NAZIONALE
DEGLI
INGEGNERI

In the UAE, the prolific use of technology and social media has reduced the gap in adapting global trends. The "Designs" are in line with the increasingly fast lifestyles of UAE's residents and the 3D printing evolutions are bringing new possibilities of decoration and creative innovation. In the last few decades, the United Arab Emirates have been elevated as the eminent architectural design area with a stunning skyline boasting some of the the tallest skyscrapers in the world and the innovative buildings that push the limits of architectural imagination as never before. This Congress intends to make a contribution to the interpretation of the Construction Industry in the UAE where, certainly, Italian talent is able to bring a peculiar trademark.

**The construction industry is the largest
GCC market with a value of \$2.6 trillion**
